

Lab04 and A2: Collections

COGS 18 Winter 2022

Sam Lau

bit.ly/sam-wi22

lau@ucsd.edu

OH: Mon 11-12

Starting next week, lab will be in-person (CSB 115)

CL04 tips (bit.ly/sam-wi22)

Collection Questions: If you're having trouble with this, review the code from Lecture 7

Indexing:

What does `my_lst[0]` give? What about `my_lst[1:4]`?

If you're still having trouble, see the code from Lecture 7, section Collections: Lists -> Indexing

Collections + Conditionals Question: After your code runs, the variable output should have the value 'try again'.

Part III: The code inside the function should be almost identical to the code from the previous question.
